**Winter Industrial/ In-house Training of 2-3 weeks done after 5th Semester Examinations and before start of 6th semester. Training report by the student to be submitted within in one week of start of 6th Semester. Viva-Voce examination to be held within 3-weeks of the start of 6th semester.

Job Role: ---Java Programmer Trainee, Linux Administrator, Web Programmer Trainee, Database administrator, Network Administrator, C#.net software developer, System Analyst, Software Quality engineer
Paper Title: Logic Development Techniques
Paper Code: SD103

Job Roles:
Data Entry operator, IT Help Desk, Office Executive, Software Trainee, Technical Support Voice, B.P.O, Lab Technician, Database Administrator, Network Administrator, Application Programmer

Objectives:
1. To develop the logic of the different problems.
2. To equip students with the basic knowledge of logic development techniques.
3. To enhance the skills of students for software development.

Instructions:
1. The syllabus of this paper has been divided into FOUR units.
2. Examiner will set a total of NINE questions comprising two questions from each unit, including Question No. 1 (compulsory) of short answer type covering the whole syllabus.
3. The students are required to attempt one question from each unit and the entire Compulsory Question No. 1.
4. All questions carry equal marks.

UNIT - I

Unit II
System Analysis and Design: Definition of problem, Feasibility study, Requirement analysis, Designing, Coding, Testing and Implementation of software project.

UNIT - III
Basics of Programming Language Usage of Character Set, Meaning of Keywords and Identifiers, Role of Data Types, Constants and Variables. Importance of type Casting. Different Types of Operators and their Precedence, Expressions, Conditional Statements

Unit IV
Control Statements: Decision Making statements (if, if-else, else if, nested if), Looping Statements (For, While, do-while), Usage of Exit, Continue, Break and Goto Statement. Introduction of array and functions.

References Resources:
3. Learn Programming in C, Anshuman Sharma, Lakanpal Publisher
Job Role: Data Entry operator, IT Help Desk, Office Executive, Software Trainee, Technical Support Voice, B.P.O, Lab Technician, Database Administrator, Network Administrator, Application Programmer

Objectives:

1. To familiarize the students with the Fundamentals of Information Technology and its applications.
2. To use computer systems at operating system level and application level.
3. To assess the implications for the markets and organizational change of advances in information technologies

Instructions:

1. The syllabus of this paper has been divided into FOUR units.
2. Examiner will set a total of NINE questions comprising two questions from each unit, including Question No. 1 (compulsory) of short answer type covering the whole syllabus.
3. The students are required to attempt one question from each unit and the entire Compulsory Question No. 1.
4. All questions carry equal marks.

Unit I
Operating Systems - Windows and Unix. Fundamentals of windows, anatomy of windows, Operations on window: Opening, Minimizing, Maximizing, Moving, Resizing, Closing; Windows Explorer, Folders: Creating, deleting, copying, renaming folders, folder properties; Icons, Menu, Taskbar, Control panel, Recycle bin. Overview of UNIX structure, general purpose UNIX commands such as date, echo, cal, bc, pwd, passwd; file and directory commands such as ls, mkdir, cp, mv, rm. process management commands such as ps, kill, nohup, communication commands such as news, mesg, wall; working with editor introduction to shell programming

Unit II
Word Processing Package: Basics of Word Processing; Word Processing Basics; Text creation, Manipulation, Finding and replacing, Formatting of text; Printing of word document, Page Layout: Margin setting, Alignments, Adding Borders and shading, Adding Headers and Footers, Setting up Multiple columns, Working with tables, Spell check, Auto Correct, Grammar facility, Retrieving often used text; Auto text character formatting, language setting and thesaurus; Macros; Mail merge.

Unit III
Spreadsheet Package: Worksheet Basics, Data Entry in Cells: Entry of numbers, text and formulae, Moving data in a worksheet, Moving around in a worksheet, Selecting Data Range. Using the interface (Toolbars, Menus), Editing Basics, Working with workbooks, Cell referencing: Absolute, Relative and Mixed; Formatting and Calculations :using Autofill,

**Unit IV**

**Presentation Packages:** Basics, General Features, Creating a presentation, Different types of slide views, Master Slides and its use, Formatting Slides: slide design, Layout and background; Animation effect, Transition effect, timing effects, Macros.

**Database Package:** Introduction to Database, Tables, Data Types, Attributes, Records; Overview of MS-ACCESS, Creating Database, Creating Tables, Data types, Importing and Exporting data, using Wizards, Creating forms and queries.

**References Resources:**
4. Anshuman Sharma: Fundamentals of Information Technology, Lakhanpal Publisher
B.Voc. (Software & Development)
Semester : I

Paper Title: Internet Application
Paper Code: SD105
Credits: 06

Job Roles:
Data Entry operator, IT Help Desk, Office Executive, Software Trainee, Technical Support Voice, B.P.O, Lab Technician, Database Administrator, Network Administrator, Application Programmer

Objectives:
1. To analyze the performance of an Internet application protocol and its relation to the underlying network protocols.
2. To promote educational applications of the Internet technology for the benefit of government, colleges, polytechnics, universities and other educational institutions, industry and the public at large.

Instructions:
1. The syllabus of this paper has been divided into FOUR units.
2. Examiner will set a total of NINE questions comprising two questions from each unit, including Question No. 1 (compulsory) of short answer type covering the whole syllabus.
3. The students are required to attempt one question from each unit and the entire Compulsory Question No. 1.
4. All questions carry equal marks.

UNIT – I
Internet and Intranet: Introduction, History, Services of internet, working of internet, intranet, working of intranet, difference between internet and intranet.
E–Mail: Concept, Advantage and disadvantage, structure of an E–Mail message, working of E–Mail (sending and receiving messages), managing E–Mail, and Implementation of outlook express.

UNIT - II
Internet Protocol: Introduction, File Transfer Protocol (FTP), Gopher, Telnet, other protocols Like HTTP and TCP/IP.

UNIT - III
Search Engine: Introduction to search engine, component of search engine, working of search engine, Web directory, difference between search engine and web directory.

UNIT - IV
News Group: Basic concepts of newsgroup. Online transactions like billing system, electronic commerce.

References Resources:
1. Internet and its Applications by Ackerman.
2. Anshuman Sharma:Fundamentals of Internet Applications, Lakhanpal Publisher
4. Data Communications and Networking by Behrouz A. Forouzan
B.Voc. (Software & Development)

Semester: II

Paper Title: Relational Database Management System
Paper Code: SD108

Credits: 06

Job Roles: Data Entry operator, IT Help Desk, Office Executive, Software Trainee, Technical Support Voice, B.P.O, Lab Technician, Database Administrator, Network Administrator, Application Programmer

Objectives:
1. To provide good understanding of database design, modelling and implementation of database management systems.
2. To educate students with the fundamental concepts of Data Base Design, Data Models and different Data Base Languages.
3. To make access to the data easy for the user.

Unit I
Introduction: Database vs. File Oriented Approach, Advantages and Disadvantages of DBMS, Data models: Hierarchical, Network and Relational models.

Unit II
Entity Relationship model, Client-Server Architecture, Data Independence. Concept of Relational Algebra and Calculus, Storage Organization for Relations,

Unit III
Relational Algebra: Operations - union, intersection, difference, Cartesian product, projection, selection, division and relational algebra queries; Relational Calculus: Tuple oriented and domain oriented relational calculus and its operations, Normalization and its forms.

Unit IV
Database Integrity, Security, Concurrency, Backup and Recovery of the database. Design and structure of Distributed databases

References Resources:
1. An Introduction to Database System, Galgotia Publications By Desia, B.C
2. Database System Vol I & II, Narosa Publications By Date, C.J
3. Fundamentals of DBMS, Lakhanpal Publisher, By Anshuman Sharma
B.Voc. (Software & Development)

Paper Title: **RDBMS using MySQL**  
**Semester : II**

**Paper Code:** SD109  
**Credits:** 06

**Job Roles:** Data Entry operator, IT Help Desk, Office Executive, Software Trainee, Technical Support Voice, B.P.O, Lab Technician, Database Administrator, Network Administrator, Application Programmer

**Objectives:**
1. To introduce principles and foundations of databases, including architecture, design issues, integrity control, query processing and optimization, transactions, and concurrency control.
2. To design and implement database for enterprise application.

**Instructions:**
1. The syllabus of this paper has been divided into FOUR units.
2. Examiner will set a total of NINE questions comprising Two questions from each unit, including Question No. 1 (compulsory) of short answer type covering the whole syllabus.
3. The students are required to attempt one question from each unit and the entire Compulsory Question No. 1.
4. All questions carry equal marks.

**UNIT I**
**Database Fundamentals:** What is a database? What is MySQL? , Introduction to MySQL & MySQL workbench.
**Database Design:** Introduction To Database Design, Learn Database Normalization with the help of a case study, Learn ER Modelling with a Case Study

**UNIT II**
**MySQL Basics:** How To Create A Database & MySQL Data Types, How to use SELECT in MySQL, How to query data using Where clause in MySQL, How to use Insert Into in MySQL, How to Delete & Update data in MySQL
**Data Sorting:** How sorting is done in MySQL, using ORDER BY, DESC and ASC, How to use Group By in MySQL, How to use Wildcards in MySQL, Using Regular Expressions & Wild Cards in MySQL

**UNIT III**
**Functions:** Ultimate guide to Functions used in PHP, How to use Aggregate Function in MySQL, All about Null value & Keyword in MySQL, How to use Auto Increment in MySQL, How to use Alter, Drop & Rename function in MySQL, How to use Limit keyword in MySQL

**UNIT IV**
**Queries:** Using Sub-Queries in MySQL, How to use Joins in MySQL, How to use Unions in MySQL, How to use Views in MySQL, How to use Index in MySQL **Minor Application Design:** Creating an Application using MySQL

B.Voc. (Software & Development)
Semester : II

Paper Title: Programming in C Language
Paper Code: SD110  Credits: 06

Job Roles: Data Entry operator, IT Help Desk, Office Executive, Software Trainee, Technical Support Voice, B.P.O, Lab Technician, Database Administrator, Network Administrator, Application Programmer

Objectives:
1. To help the students in finding solutions to the various real life problems and converting the solutions into computer program using C.
2. To acquire knowledge about the basic concept of writing a program.
3. To learn and acquire the art of computer programming.

Instructions:
1. The syllabus of this paper has been divided into FOUR units.
2. Examiner will set a total of NINE questions comprising two questions from each unit, including Question No. 1 (compulsory) of short answer type covering the whole syllabus.
3. The students are required to attempt one question from each unit and the entire Compulsory Question No. 1.
4. All questions carry equal marks.

Unit I

Fundamental of ‘C’: Problem Solving steps, Structure of C Program, I/O statements, assignment statements, C character Set, Variables, Operators and Expressions, Standards and Formatted statements, Keywords, Data Types and Identifiers.

Control Structures: Introduction, Decision making with if – statement, if-else and Nested if, while and do-while, for loop. Jump statements: break, continue, goto, switch Statement.

Unit II

Functions: Function Declaration and Definition, types of functions, Call by value and Call by reference, Recursion, Pre-processor Directives.

Unit III

Preprocessor Directives: Introduction and Use, Macros, Conditional Preprocessors and Header Files.
Pointers: Introduction, declaration, initialization, pointers and arrays

UNIT IV

Structure and Union: Declaring of structure, accessing structure members, Array of structure, nested of structure, Unions.
Files: introduction, creating, opening of data files, closing a data file and file handling functions.

References Resources::
3. Learn Programming in C, Anshuman Sharma, Lakhanpal Publisher
B.Voc. (Software & Development)

Semester: II

Paper Title: PC Maintenance & Trouble shooting

Paper Code: SD111

Credits: 06

**Job Roles:** Data Entry operator, IT Help Desk, Office Executive, Software Trainee, Technical Support Voice, B.P.O, Lab Technician, Database Administrator, Network Administrator, Application Programmer

**Objectives:**

1. To equip the students with the knowledge of hardware maintenance, Software installation and handling troubleshooting.
2. To enhance the basic hardware skills of the students.

**Instructions:**

1. The syllabus of this paper has been divided into FOUR units.
2. Examiner will set a total of **NINE** questions comprising Two questions from each unit, including Question No. 1 (compulsory) of short answer type covering the whole syllabus.
3. The students are required to attempt one question from each unit and the entire Compulsory Question No. 1.
4. All questions carry equal marks.

**Unit-I**

**Troubleshooting General PC Problems:** Introduction, General Troubleshooting rules, Common Problems & Solutions, Preventive Maintenance.

**BIOS:** Typical Motherboard BIOS, BIOS Features, BIOS & Boot Sequences, BIOS Shortcoming & Compatible Issues, BIOS Troubleshooting, BIOS Upgrades.

**Unit-II**

**Hard Disk:** Introduction, Disk Basics, Disk Performance & Characteristics, Drive, Construction, Drive Testing & troubleshooting.

**Motherboard & Buses:** Introduction, Motherboard Components, Expansion Slots system Bus Functions & Features. Upgrading & Troubleshooting Motherboard, General Bus Troubleshooting.

**Unit-III**

**Basic Memory Concepts:** Introduction, Installing Memories, Upgrade Options & Strategies, Replacing Memories with Higher Capacity. Troubleshooting Memory.

**Unit-IV**

**Printers:** Printer Technology, How Printer Works, Attaching Printer, Installing Printer Drivers, Preventive Maintenance, Common Printer Problems & Solution

**Error Code:** Beep Code, Post Code, Post Reader Card.

**References Resources:**

Paper Title: Summer Industrial Training

Job Roles: Data Entry operator, IT Help Desk, Office Executive, Software Trainee, Technical Support Voice, B.P.O, Lab Technician, Database Administrator, Network Administrator, Application Programmer

At the end of the semester, students should compulsorily undergo two week industrial training and the relevant certificate and project report has to be submitted.

The report should consist of the following:

1. Cover page including project title, name of the student, name of department and project guide.
2. Acknowledgements
3. Contents with page number
4. Introduction and background of the application Objectives
5. System analysis
6. System feasibility study
7. Further scope of the project Bibliography
8. Appendices
**B.Voc. (Software & Development)**

**Semester : III**

**Paper Title:** Mathematical Tools for Computer Science

**Paper Code:** SD202  
**Credits:** 06

**Job Roles:** Information and system operation manager, Software Programmer, System Analyst, I.T. Officers, Computer Assistants for the General Office & Accounts Management, Database Administrator, Network Administrator, Website Development Programmer.

**Objectives:**
1. To develop arithmetic, algebraic, geometric, and problem-solving skills.
2. To apply problem solving and logical skills.
3. To make the students familiar with several subfields of mathematics (e.g. numerical analysis, topology, operations research).

**Instructions:**
1. The syllabus of this paper has been divided into FOUR units.
2. Examiner will set a total of NINE questions comprising Two questions from each unit, including Question No. 1 (compulsory) of short answer type covering the whole syllabus.
3. The students are required to attempt one question from each unit and the entire Compulsory Question No. 1.
4. All questions carry equal marks.

**Unit I**

**Sets and Relations:** Definition of sets, subsets, complement of a set, universal set, intersection and union of sets, De-Morgan’s laws, Cartesian products, Equivalent sets, Countable and uncountable sets, minset, Partitions of sets. **Relations:** Basic definitions, graphs of relations, properties of relations.

**Unit II**

**Matrix:** Introduction, Different kinds, matrix addition and scalar multiplication, multiplication of matrices, transpose etc. Square matrices, inverse and rank of a square matrix, differentiation and Integration.

**Unit III**

**Numerical Methods:** Solving simultaneous equations using Gauss elimination, Gauss Jordan Methods, Matrix Inversion method.

**Unit IV**

**Linear Programming:** Graphical and Simplex method, Duality in Linear programming, Transportation problems, Assignment and travelling salesman problem.

**References Resources:**
B.Voc. (Software & Development)
Semester : III

Paper Title: Object oriented programming using C++
Paper Code: SD203

Credits: 06

Objectives:
1. To help the students gain a better understanding of OO design and program implementation by using OO language features.
2. To make students learn various concepts of object oriented approach towards problem solving.
3. To introduce different techniques pertaining problem solving skills.

Instructions:
1. The syllabus of this paper has been divided into FOUR units.
2. Examiner will set a total of NINE questions comprising Two questions from each unit, including Question No. 1 (compulsory) of short answer type covering the whole syllabus.
3. The students are required to attempt one question from each unit and the entire Compulsory Question No. 1.
4. All questions carry equal marks.

Unit I

Unit II

Classes: Class declaration: Data Members, Member Functions, Private and Public Members, Data Hiding and Encapsulation, Arrays within a class.

Objects: Creating objects, Accessing class data members, Accessing member functions, Array of objects, Objects as function arguments: Pass by value, Pass by reference, Pointers to Objects.

Constructors and Destructors: Constructors: Declaration and Definition, Default Constructors, Parameterized Constructor and Destructors.

Unit III

Polymorphism: Classification, static and dynamic polymorphism, virtual functions, pure virtual functions.

Unit-IV

Inheritance: Extending classes: Concept of Inheritance, base class, derived class, defining derived classes, visibility modes, private, public and protected

2. E. Balaguruswamy : Object Oriented Programming with C++, TMH.
5. Herbert Schildt : C++ The Complete Reference, TMH.
B.Voc. (Software & Development)  
Semester : III  

Paper Title: Data structure using C++  
Paper Code: SD 204  
Credits: 06  

Objectives:
1. To teach students various data structures and explain to them algorithms for performing various operations on these data structures.  
2. To use various data structures effectively in application programs.  
3. To determine which algorithm or data structure to be used in different scenarios.

Instructions:
1. The syllabus of this paper has been divided into FOUR units.  
2. Examiner will set a total of NINE questions comprising Two questions from each unit, including Question No. 1 (compulsory) of short answer type covering the whole syllabus.  
3. The students are required to attempt one question from each unit and the entire Compulsory Question No. 1.  
4. All questions carry equal marks.

Unit I
Introduction of Data Structure: Definition of Data Structure, types of Data Structure.  
Operations on data structure.

Arrays: Linear and multi-dimensional arrays and their representation, operations on arrays.  
Sorting and searching in array.

Unit II
Stacks & Queues: Definition of stacks Sequential and linked representations, operations on stacks, Queues: Sequential representation of queue, linear queue, circular queue, operations on linear and circular queue, linked representation of a queue and operations on it, priority queue.

Linked List: Linear linked list, operations on linear linked list, doubly linked list, operations on doubly linked list.

Unit III
Trees: Inserting a node, deleting a node, AVL trees, Heap Trees Practical implementation.

Unit IV
Graphs: Traversal of a graph (breadth-first search and depth-first search), and applications of graphs.

References Resources::

Objectives:

1. To explain the importance of data communications and the Internet in supporting business communications and daily activities.
2. To analyze the services and features of the various layers of data networks.
3. To explain the role of protocols in networking.

Instructions:

1. The syllabus of this paper has been divided into FOUR units.
2. Examiner will set a total of NINE questions comprising Two questions from each unit, including Question No. 1 (compulsory) of short answer type covering the whole syllabus.
3. The students are required to attempt one question from each unit and the entire Compulsory Question No. 1.
4. All questions carry equal marks.

Unit I

Physical Layer:- Transmission Media, Switching, Multiplexing, Modem..

Unit II

Data Link Layer:- Design Issues, Framing, Error detection & Correction Codes, Flow Control (Stop & Wait, Sliding Window), Error Control, SLIP (Serial Line IP) & PPP(Point to Point).

Unit III

Unit-IV

Semester : IV

Paper Title: Operating System

Paper Code: SD 208

Credits: 06

Objectives:
1. To introduce students with the basic concepts of Operating System, its functions and services.
2. To make students understand the underlying principles, techniques and approaches which constitute a coherent body of knowledge in operating systems.
3. To make students understand how operating system is used as a resource manager.

Instructions:
1. The syllabus of this paper has been divided into FOUR units.
2. Examiner will set a total of NINE questions comprising Two questions from each unit, including Question No. 1 (compulsory) of short answer type covering the whole syllabus.
3. The students are required to attempt one question from each unit and the entire Compulsory Question No. 1.
4. All questions carry equal marks.

UNIT I

Introduction to Operating System:- OS, History & Types of OS, Functions/Operations of OS, Users services/jobs, Segmentation, Virtual memory and Page Replacement algorithms, Scheduling:- Process states, virtual processors, interrupt mechanism, scheduling algorithms- Pre-emptive and Non-pre-emptive scheduling; Scheduling Algorithms: FCFS, SJFS, Priority scheduling, Multilevel queue scheduling, Multilevel feedback queue scheduling.

UNIT II

UNIT III

Memory Management: Hierarchy of memory types, Cache memory: Types: Associative memory, direct mapped, set associative.

Memory Allocation: Address binding, Address Space, Memory Protection, Contiguous and Non-Contiguous allocation, Swapping, Fragmentation; Paging: Protection, Shared pages, Techniques for structuring of page table.

UNIT IV

Segmentation: Segmentation with paging; Virtual Memory: Demand paging; Page replacement Algorithms: FIFO, Optimal, LRU, LFU, MFU, Working set, Thrashing;

References Resources:
3. Sharma Anshuman -Fundamentals of Operating System, Lakhanpal Publisher
4. Operating System by Madnick Donovan.

Objectives:
1. To introduce the whole range of web technologies starting from HTML, DHTML, JAVA SCRIPT.
2. To focus on practical aspects of the web technologies.
3. To make the students understand the various steps in designing a creative and dynamic website.

Instructions:
1. The syllabus of this paper has been divided into FOUR units.
2. Examiner will set a total of NINE questions comprising Two questions from each unit, including Question No. 1 (compulsory) of short answer type covering the whole syllabus.
3. The students are required to attempt one question from each unit and the entire Compulsory Question No. 1.
4. All questions carry equal marks.

SECTION – A

Basic terminology: About Web Server; Web Client/Browser, Understanding how a Browser communicates with a Web Server, Website, Webpage, Static Website, Dynamic Website, Internet, Intranet, Extranet, WWW, URL

HTML: Structure of an HTML program, Paragraph Breaks, Line Breaks; Emphasizing Material in a Web Page (Heading Styles, Drawing Lines); Text Styles (Bold, Italics, Underline); Other Text Effects (Centering (Text, Images etc.)

Lists: Unordered List, Ordered Lists, Definition lists Adding Graphics to HTML Documents using the Border, Width, Height, Align, ALT Attributes

Tables: Caption Tag, Width, Border, Cell padding, Cell spacing, BGCOLOR, COLSPAN and ROWSPAN Attributes.

SECTION – B

Linking Documents: Anchor tag, External Document References Resources:, Internal Document References Resources: and Image Maps

Frames: Introduction to Frames: The <FRAMESET> tag, The <FRAME> tag, Targeting Named Frames

DHTML: Introduction to cascading style sheets (CSS), Style tag, Link tag, Types of CSS: In-Line, Internal, External

Forms: Attributes of Form element, Input element, The Text Element, Password, Button, Submit Button, Reset Button, The Checkbox, Radio, TextArea, Select and Option
SECTION – C

Java Script: Introduction and Features of JavaScript, Writing JavaScript into HTML, tokens, data types, variables, operations, control constructs, strings arrays, functions, core language objects, client side objects, event handling. Applications related to client side form validation. Other Built-In Objects in JavaScript: The String Object, The Math Object, The Date Object;

SECTION – D

Web Hosting: Understanding Domain Name & Web Space, Getting a Domain Name & Web Space (Purchase or Free), Uploading the Website to Remote Server, Introduction to Open Source Third party FTP Tools

B.Voc. (Software & Development)
Semester : IV

Paper Title: Java Programming
Paper Code: SD 210

Credits: 06

Job Roles: Information and system operation manager, Software Programmer,
System Analyst, I.T. Officers, Computer Assistants for the General Office & Accounts
Management, Database Administrator, Network Administrator, Website Development
Programmer.

Objectives:
1. To write programs in Java using object-oriented paradigm.
2. To familiarize students with the fundamentals of Java programming, program
design and problem-solving.

Instructions:
1. The syllabus of this paper has been divided into FOUR units.
2. Examiner will set a total of NINE questions comprising two questions from
each unit, including Question No. 1 (compulsory) of short answer type covering
the whole syllabus.
3. The students are required to attempt one question from each unit and the entire
Compulsory Question No. 1.
4. All questions carry equal marks.

Unit I
Introduction to java: Definition, Comparison of java with C++, byte code, java virtual
machine, constants ,variables, data types, operators, expressions, control structures,
concept of class, creating objects, accessing class members, constructors, method
overloading.

Unit II
Packages and interfaces: Defining a package, understanding CLASSPATH, access
protection: importing packages, interfaces, defining an interface, implementing
interfaces, applying interfaces, variables in interfaces. Exception handling: Definitions,
types, try and catch multiple try and catch, built in exceptions.

Unit III
Multithreading: Java thread model, thread priorities, synchronizations, messaging,
thread class and runnable interface, main thread: creating a thread, implementing
runnable extending thread, creating multiple threads.

Unit IV
I/O applets: I/O Basics: streams, predefined streams, reading console I/P, writing
console O/P, print writer class, reading and writing files, applet fundamentals, AWT
controls, layout managers and menus, string handling and event handling.

B.Voc. (Software & Development)

Semester: IV

Paper Title: COMPUTER BASED ACCOUNTING

Paper Code: SD 211

Credits: 06

Objective:

1. To equip the students with the basic knowledge of accounting and implement it by using software package TALLY.

Instructions:

1. The syllabus of this paper has been divided into FOUR units.
2. Examiner will set a total of NINE questions comprising Two questions from each unit, including Question No. 1 (compulsory) of short answer type covering the whole syllabus.
3. The students are required to attempt one question from each unit and the entire Compulsory Question No. 1.
4. All questions carry equal marks.

UNIT I

Accounting: concepts and conventions, double entry system of accounting, introduction of basic books of accounts of sole proprietary concern, control accounts for debtors and creditors, closing of books of accounts and preparation of trial balance. Final Accounts: Trading, profit and loss accounts and balance sheet of sole proprietary concern with normal closing entries, Introduction to manufacturing account, final accounts of partnership firms, limited company.

UNIT II

Introduction to computerized financial accounting: coding logic and codes required, master files, Transaction files, Introduction to documents used for data collection, processing of different files, outputs obtained.

UNIT III

Introduction to computerised Inventory control, types of inventory and associated documents, Inventory reports-nature and types, Inventory Control: ABC and Ageing analysis, Methods of Stock validation: LIFO, FIFO, actual bases, Interfacing Inventory with Financial Accounting, Purchasing Sub-Systems, Sales Order processing. Introduction to Computerised Payroll & Invoicing Applications, Exposure to: Structure, Processing and Reports, Interfacing these applications to financial Accounting.

UNIT IV

B.Voc. (Software & Development)
Semester: IV

Paper Title: Summer Industrial Training
Paper Code: SIT-401

Credits: 06

At the end of the semester, students should compulsorily undergo two weeks industrial training and the relevant certificate and project report has to be submitted.

The report should consist of the following:

1. Cover page including project title, name of the student, name of department and project guide.
2. Acknowledgements
3. Contents with page number
4. Introduction and background of the application
5. Objectives
6. System analysis
7. System feasibility study
8. Further scope of the project
9. Bibliography
10. Appendices

Objectives:
1. To make students familiar with all the software development principles, models and designing tools required to develop the software.
2. To make students understand theories, methods, and technologies applied for professional software development.
3. To discuss the concepts of software products and software processes.

Instructions:
1. The syllabus of this paper has been divided into FOUR units.
2. Examiner will set a total of NINE questions comprising two questions from each unit, including Question No. 1 (compulsory) of short answer type covering the whole syllabus.
3. The students are required to attempt one question from each unit and the entire Compulsory Question No. 1.
4. All questions carry equal marks.

Unit I

Software Project Management: Software project management, Project planning and control, cost estimation, project scheduling using PERT and GANTT charts.

Unit II
Software Design: Basic issues in software design, modularity, cohesion, coupling and layering, function-oriented software design: DFD and Structure chart, Object-oriented software development, user interface design.

Unit III
Software Testing: Fundamentals of testing, White-box and black-box testing, Test coverage analysis and test case design techniques, Mutation testing, Static and dynamic analysis, Software Metrics, Types of Software Metrics.

Unit IV

References Resources:
B.Voc. (Software & Development)
Semester : V

Paper Title: Computer Graphics and Multimedia Applications
Paper Code: SD 303
Credits: 06

Objectives:
1. To study the graphic techniques and algorithms and enable the students develop their creativity.
2. To write programs that demonstrates image processing techniques.

Instructions:
1. The syllabus of this paper has been divided into FOUR units.
2. Examiner will set a total of NINE questions comprising two questions from each unit, including Question No. 1 (compulsory) of short answer type covering the whole syllabus.
3. The students are required to attempt one question from each unit and the entire Compulsory Question No. 1.
4. All questions carry equal marks.

Paper Title: **ASP.Net using C#**  
Paper Code: SD 304  
Credits: 06  

**Job Roles:** Java Programmer Trainee, Linux Administrator, Web Programmer Trainee, Database administrator, Network Administrator, C#.net software developer, System Analyst, Software Quality engineer.  

**Objectives:**  
1. To make students familiar with development of console, windows and web applications using C# on .NET platform.  
2. To improve object-oriented programming skills through practice and insights gained by studying a new programming language.  
3. To gain a working knowledge of the C Sharp programming language and build object-oriented applications using C Sharp.  

**Instructions:**  
1. The syllabus of this paper has been divided into FOUR units.  
2. Examiner will set a total of **NINE** questions comprising Two questions from each unit, including Question No. 1 (compulsory) of short answer type covering the whole syllabus.  
3. The students are required to attempt one question from each unit and the entire Compulsory Question No. 1.  
4. All questions carry equal marks.  

**UNIT I**  

**UNIT II**  

Standard Rich Controls: Templates in ASP. NET, Composite Data Bound Controls, Designing Website With Master Pages, Maintaining Application State, Microsoft Application Block, OOPS/COM/DLL/Assembly.  

**UNIT III**  

Globalization And Localization: Custom Controls, Web User Controls, Caching Application Pages and Data, Security, Java Scripts, JQUERY, AJAX .NET.  

**UNIT IV**  

**Suggested Resources for Readings:**  
Paper Title: Linux operating System
Paper Code: SD 305
Credits: 06

Objectives:
1. To get familiar with Linux system, its commands, files & directories, system, shell programming,
2. To introduce the student with Unix/Linux kernel programming techniques.

Instructions:
1. The syllabus of this paper has been divided into FOUR units.
2. Examiner will set a total of NINE questions comprising Two questions from each unit, including Question No. 1 (compulsory) of short answer type covering the whole syllabus.
3. The students are required to attempt one question from each unit and the entire Compulsory Question No. 1.
4. All questions carry equal marks.

UNIT I
Introduction to Linux : What is Linux, Linux's History, Minimum System Requirements; Installing Linux : Working with Linux, Floppy-less Installation, Boot and Root Disks, Choosing Text or Graphics Installation, Setting up your Hard Drive, Formatting the Partitions, Setting up the Ethernet, Configuration X, Selecting packages to Install, Using LILO; Partitioning the Hard Disk : Linux Swap Space Partitions, Linux's fdisk, Enabling the Swap Space for Installation, Creating the Linux File-system partition, Using LILO .

UNIT II
Using Linux : Starting and Stopping your Linux System, Linux Shutdown Commands, Login, Passwords, Creating a New Login, Logging Out; Trying out your new Login : Linux Error Messages, Search Paths; The who Command, Commands and Programs, Basic Linux Commands : How Linux Commands Work, Command Options, Other Parameters, Input and Output Redirection, National conventions used to Describe Linux commands, Online help available in Linux, The Linux Man pages, Finding keywords in Man pages, The bash shell help facility; Wildcards : * and ?, Environment Variables, Process and How to Terminate them, The process status Commands : ps, The process termination command : kill, the su command, the grep command.

UNIT III
Using the File System: Files Overview, Common types of files, filenames, Directories an Overview, Parent directories and sub-directories, The root directory, How directories are named, The home directory; File and Directory Permissions : File and Directory

UNIT IV

Editing and Typesetting: Text Editors vi, The vi Editor, Starting vi, vi modes, Inserting Text, Quitting vi, Moving the Cursor, Deleting Text, Copying and Moving Text, Searching and Replacing Text, Setting Preferences.

Resources:

Suggested Resources for Readings:

B.Voc. (Software & Development)  
Semester : VI

Paper Title: **E-Commerce**  
Paper Code: SD 308  
Credits: 06

**Job Roles:** Java Programmer Trainee, Linux Administrator, Web Programmer Trainee, Database administrator, Network Administrator, C#.net software developer, System Analyst, Software Quality engineer

**Objectives:**
1. To integrate the knowledge of foundational functional areas of commerce in order to develop a holistic perspective on the role of IT in organizations.
2. To discuss emerging e-commerce topics.
3. To apply the concepts of Internet security and multimedia in e-business applications.

**Instructions:**
1. The syllabus of this paper has been divided into FOUR units.
2. Examiner will set a total of **NINE** questions comprising Two questions from each unit, including Question No. 1 (compulsory) of short answer type covering the whole syllabus.
3. The students are required to attempt one question from each unit and the entire Compulsory Question No. 1.
4. All questions carry equal marks.

**Unit-I**

**Introduction** - E-commerce. Advantages, Types and Classification of e-commerce, Building the Web site, Internet, Online transaction, Shopping Card, Software, Risk of e-commerce, email Ids.

**Digital Signature:** Digital Signature and its Application in E-Commerce, E-Commerce Privacy and Trust.

**Unit-II**

**Enterprise Resource Planning:** The Emergence of ERP Systems, Business benefits of ERP, ERP Modules and design alternatives, challenges of ERP implementation, Business Processed engineering, ERP system development process.

**Unit-III**

**Mechanism of making payment through internet:** Online payment mechanism; Electronic Payment systems, payment Gateways, Visitors to website, tools for promoting websites; Plastic Money: Debit Card, Credit Card.

**Unit-IV**

**Suggested Resources for Readings:**
4. Rajesh Ray: Enterprise Resource Planning – Text and cases, TMH.
B.Voc. (Software & Development)
Semester: VI

Paper Title: Emerging Technologies in Computing
Paper Code: SD 309
Credits: 06

Job Roles: Java Programmer Trainee, Linux Administrator, Web Programmer Trainee, Database administrator, Network Administrator, C#.net software developer, System Analyst, Software Quality engineer

Objectives:
1. This course enables students to be familiar with Emerging Technologies such as Parallel Computing, Cloud Computing, Green Computing and Data Mining & data warehousing.

Instructions:
1. The syllabus of this paper has been divided into FOUR units.
2. Examiner will set a total of NINE questions comprising Two questions from each unit, including Question No. 1 (compulsory) of short answer type covering the whole syllabus.
3. The students are required to attempt one question from each unit and the entire Compulsory Question No. 1.
4. All questions carry equal marks.

Unit-I
Parallel Computing: Concept of Parallel Computing, Flynn's Classical Taxonomy: SISD, SIMD, MISD, MIMD; Parallel Computer Memory Architectures: Shared Memory, Distributed Memory, Hybrid Distributed-Shared Memory; TDB and BNP Class of Scheduling Algorithms.

Unit-II
Cloud Computing: Introduction and use, Architecture, Service Models: infrastructure as a service, platform as a service, and software as a service.

Unit-III

Unit-IV
Data mining & Warehouse: KDD versus data mining, Stages of the Data Mining Process- task primitives, Data Mining Techniques -Data mining knowledge representation – Data mining query languages, Integration of a Data Mining System with a Data Warehouse

Suggested Resources for Readings:
1. Jiawei Han and Micheline Kamber, Data Mining: Concepts and Techniques, Morgan Kaufmann Publishers, ISBN: 1558604898
5. M. Sasikumar, Dinesh Shikhare, P. Ravi Prakash: Introduction to Parallel Processing, PHI.
Paper Title: **Network Management**

**Job Roles:** Java Programmer Trainee, Linux Administrator, Web Programmer Trainee, Database administrator, Network Administrator, C#.net software developer, System Analyst, Software Quality engineer.

**Objectives:**
1. This course will enable the students to manage the network devices and configuring servers

**Instructions:**
1. The syllabus of this paper has been divided into FOUR units.
2. Examiner will set a total of NINE questions comprising Two questions from each unit, including Question No. 1 (compulsory) of short answer type covering the whole syllabus.
3. The students are required to attempt one question from each unit and the entire Compulsory Question No. 1.
4. All questions carry equal marks.

**Unit-I**

**Management of Network Devices:**- Managing network devices :- Routers, Switches, hubs Startup and Configuration

**Unit-II**

**Configuring and installing Window based servers:**- Configuring IP addresses , Installing and Configuring Windows Server - Preparing for Installation, Creating windows server boot disk, Installing windows server, Configuring server/ client

**Unit- III**

**Configuring & installing Linux based Servers:**- Configuring IP addresses , steps for installing linux based server, installation of drivers , Configuring server on the network

**Unit-IV**

**References Resources:**-
1. **Network Management: Concepts and Tools:**- Edited by ARPEGE Group: CHAPMAN & HALL
2. **Installing & Configuring Windows Server 2012 R2:**-Craig Zacker
3. **Complete Linux Servers:-Installation & Configuration:**- Chetan Soni
B.Voc. (Software & Development)

Paper Title: **PHP Programming**
Paper Code: SD 311
Credits: 06

**Job Roles:** Java Programmer Trainee, Linux Administrator, Web Programmer Trainee, Database administrator, Network Administrator, C#.net software developer, System Analyst, Software Quality engineer.

**Objectives:** This course will enable the students to learn the PHP language for website development.

**Instructions:**
1. The syllabus of this paper has been divided into FOUR units.
2. Examiner will set a total of NINE questions comprising Two questions from each unit, including Question No. 1 (compulsory) of short answer type covering the whole syllabus.
3. The students are required to attempt one question from each unit and the entire Compulsory Question No. 1.
4. All questions carry equal marks.

**UNIT – I**

**UNIT – II**

**UNIT – III**

**UNIT – IV**

**Suggested Resources for Readings:**
1. Christopher J.Goddard, Mark White, —Mastering VB Script□, Galgotia publications, New Delhi, Lee Purcell, Mary Jane Mara, —The ABCs of Javascript
2. Steven Holzner, —PHP: The Complete Reference
3. Note: Latest and additional good books may be suggested and added from time to time.
B.Voc. (Software & Development)
Semester : VI

Paper Title: Summer Industrial/ In-house Training and Comprehensive Viva

Paper Code: SIT-601

Credits: 06

The students will have to undergo 8 week training and prepare a project during internship. They shall submit the project report at the completion of the internship. The project will involve development of application/system software in industrial/ commercial/ scientific environment. The objective of this course is to translate a problem by designing software.

The report should consist of the following:
1. Cover page including project title, name of the student, name of department and project guide.
2. Acknowledgements
3. Contents with page number
4. Introduction and background of the application
5. Objectives
6. System analysis
7. System feasibility study
8. Further scope of the project
9. Bibliography
10. Appendices
